FOR IMMEDIATE RELEASE

Onepath Systems' Audio Visual Senior Engineer attains CTS-D certification.

Robert Mathews of Onepath Systems Earns Certification from InfoComm International

— September 21, 2010 — Robert Mathews, CTS-D, of Onepath Systems, based in Marietta, Georgia, has earned his certification from InfoComm International. The Certified Technology Specialist Design (CTS-D[®]) credential is for audiovisual professionals who have demonstrated extensive knowledge of the technology used in audio, video and display systems, and a competence, dedication and commitment to their profession. By achieving this credential, Mathews has displayed the self-confidence, professionalism and integrity needed to succeed in the field. With agreement to a code of ethics pledging truth, accuracy and a commitment to excellence in all aspects of the profession, CTS-D holders are recognized as trusted providers of services to customers of AV technology.

"As audiovisual equipment has become more sophisticated, there is increased need for professional services to assure the highest performance levels of communications technologies," said Randal A. Lemke, Ph.D., Executive Director, InfoComm International. "Employers in the public and private sectors can be confident that AV professionals holding the CTS credentials possess the necessary skills to implement audiovisual best practices, processes and procedures anywhere in the world."

The International Organization for Standardization's (ISO) United States representative, the American National Standards Institute (ANSI), has accredited InfoComm's CTS, Certified Technology Specialist – Design (CTS[®]-D) Certified Technology Specialist – Installation (CTS[®]-I) credentials under ISO/IEC 17024. ISO/IEC 17024 establishes a global benchmark for the certification of personnel. ANSI accredits standards developers, certification bodies and technical advisory groups to both the ISO and the International Electrotechnical Commission (IEC). InfoComm is the only organization within the audiovisual industry to earn ANSI accreditation for its personnel certification program, setting the industry standard for competency and quality in the AV industry. InfoComm has also received recognition from the National Certification Commission of the United States, the only AV-related certification program.

More than 9,000 AV professionals are currently InfoComm certified.

About Presentation Source: Onepath Systems, LLC is a leading provider in the southeast of building integration systems primarily engaged in the consulting, design, project implementation and maintenance of Audio-Video, Life Safety, Security, Structured Cabling, and Underground Utility Systems. We have collective systems expertise that exceeds 100 years and over the last 15 years our team has designed and installed some of the regions most extensive and elaborate systems.

Headquartered in Marietta, GA (an Atlanta suburb), with satellite offices in Georgia and Alabama; Onepath is a financially solid company with all the necessary resources to implement and carry-out projects of all sizes, shapes and scopes. Licensed and capable of doing business in each of the southeastern states, we routinely handle nationwide implementations for our customers.

About the Certified Technology Specialist Credential InfoComm's Certified Technology Specialist, Certified Technology Specialist – Design and Certified Technology Specialist – Installation are the only audiovisual certification programs accredited by the International Organization for Standardization's (ISO) United States representative, the American National Standards Institute (ANSI). Accepted by the U.S. Veterans Administration for reimbursement under the Montgomery G.I. Bill, InfoComm certification programs are designed to establish and maintain widespread credibility for the audiovisual industry and the professionals who perform the work.
