

Company Overview

“WOW! is how we describe Onepath’s performance with our project. From the beginning of the design phase through the completion of our school, Onepath has been an integral part of our audio and visual development. We highly recommend Onepath.”

**Gary Henderson, Director of IT
Strong Rock Christian School
Locust Grove, GA**

Onepath Systems is the leading provider of building technology solutions in the southeast. For over 15 years, we have assisted our clients integrate the best and most cost effective solutions for their building systems needs. As building systems technologies evolve, so does Onepath. Our strength - and a big advantage to you - is our client-dedicated team that provides unsurpassed quality, products, results and solutions. Onepath... exceeding expectations.

Network and IT Solutions

We offer strategic planning, design, installation, management and maintenance of advanced networks. Our consultants focus not only on the immediate project but also on long-term strategic needs - improving productivity, reducing complexity and strengthening ROI. Onepath offers unique network and IT services designed to improve operational efficiency and reduce costs.

Areas of specialization include:

- IP Network design, transformation and convergence.
- Network security and security-policy development
- Network and systems-operations management
- Voice-over-IP platforms
- Business-continuity planning
- Wireless planning and deployment
- Data-center design and management
- Network Project Management

IT services offered in a data center are evolving from dedicated, physical deployments of IT products (network, storage, servers, software) to logical services using shared physical IT assets. Cloud computing, virtualization, software-as-a service (SAAS), and service-oriented architecture (SOA) are all examples of this evolution that require shared physical IT infrastructure. Onepath helps identify and build solutions to address the common service event challenges of your IT infrastructure and shared networks.

Audio Visual

Onepath is a leading provider of Audio Visual technology, control systems, accessories, and services for business, hospitality, education, government and house of worship applications. We specialize in design, installation and service of multimedia technology systems from leading names at the most competitive prices.

As the convergence of AV technology and IT accelerates, it is critical that your AV Integrator have a thorough understanding of the latest technology and systems. Onepath brings this unique combination of skills and experience to the marketplace. Whether your firm wants to acquire a fully integrated AV system, add video conferencing capabilities, or simply wanting to upgrade your current system with the latest technologies; Onepath offers the right solution.

Company Overview

“Many thanks to the OnePath team for pulling the Emory Conference Center project together on-time and at budget. I know you pushed hard at the end and burned some late hours – it did not go unnoticed and I really appreciate the effort and the final outcome. I am very pleased with the quality of the end product. Thank you.”

Security and Access Control

We are one of the nation's premier dealers and integrators of electronic security systems offering access control, intrusion detection, CCTV, IP surveillance, RFID and more.

Through detailed event management platforms, security systems have become integrated into the business infrastructure. At OnePath, we design, integrate and implement innovative and class-leading security control systems. Whether it's access control for one door or thousands; video surveillance or CCTV; intrusion detection and control; or identity management. OnePath is the security systems integrator that will help you implement the right solution to protect your property, occupants, and assets.

Energy Management

By reducing electric Peak Demand and holding Consumption steady, it is possible to gain up to a 20% savings on your facility's utility bill. OnePath can help manage your energy costs and add to your bottom line. From a complete Building Energy Assessment to implementing Energy Management Tools that control when, how and where you spend your energy dollars; OnePath can deploy energy saving solutions that will improve efficiency and lower overall operating costs.

Fire and Life Safety

Nothing is more precious than the lives of your employees, staff, students, patients or customers. OnePath's Fire and Life Safety Systems are designed to meet a wide range of protection applications. From small retail stores to towering high-rise commercial buildings; from an entire school system to a sprawling university campus. OnePath is dedicated to providing you the most intelligent Fire and Life Safety Systems engineered to fit the unique protection needs of your facility. Our services include:

- Engineering, design, installation, inspection and maintenance
- Deficiency reporting
- Engineering and permitting
- Monitoring
- Training
- Service

OnePath is a partner with NOTIFIER® (a Honeywell company). For over 50 years, NOTIFIER has been a leader in the fire alarm industry. Like OnePath, their commitment to products and partnerships is what propels NOTIFIER to stand proudly above the rest.

Structured Cabling

Your systems are only as good as their infrastructure. OnePath is a premier integrator of voice and data infrastructure. Inside or outside the plant networks and pathways, our product and service offerings cover a large range of project needs.

Whether it is a simple Category 6 cable or the most extensive fiber project, OnePath will design, install and maintain it with a level of quality and professionalism that is unsurpassed in our industry. Our educational and engineering designations are proof of our commitment to excellence.
