Onepath can help manage your energy costs and add profit to your bottom line. From a complete Building Energy Assessment, to adopting HVAC Best Practices, to implementing Energy Management Tools that control when, how and where you spend your energy dollars. We help your company deploy energy saving solutions that will improve efficiency and lower overall operating costs.

Our solutions enable facility managers, building owners, and systems integrators to integrate proprietary and otherwise incompatible products into a unified enterprise solution through the synchronization, management, and control of major building system functions vital in a facility. The functions include heating, ventilating, and air conditioning (HVAC), energy, lighting, video, security, fire, life safety, and more.

The OnePath Building Energy Assessment includes:

- **Facility Energy Profile:** Appropriate physical and logical facility energy drawings with major energy users including HVAC, lighting, manufacturing equipment and data centers.
- **Utility Bill Analysis:** Complete analysis of utility bills including a table providing consumption, peak demand, and other billing factors including time of use, wholesale rates, etc.
- **Building Systems Analysis:** Includes HVAC, lighting and building automation energy assessment including run times, management process, and system efficiencies.
- **Energy Conservation Strategies and Recommendations:** Establishes energy goals and success benchmarks. Specific recommendations provide support to meet energy conservation goals.
- **Operating Savings and Capital/Operating Cost Calculations:** Defines real dollar savings and capital/operating costs associated with implementing recommendations associated with your energy goals.

Onepath can make your building better. It's all about being smarter, using less energy, being more efficient, lowering operating costs and adding to the bottom line, being safer, and contributing to a sustainable environment. Implementing Energy Management Solutions from OnePath allows you to take control of when, how and where you spend your energy dollars.
